-----

The world's largest 1 GW offshore solar farm located off the coast of Dongying, Shandong Province, China is now connected to the grid.

China has more utility-scale solar than any other country. The 277 GW of utility-scale solar capacity installed in China in 2024 alone is more than twice as much as the 121 ...

China is leading the world in new solar and wind installations and doing so at a record-shattering pace. In May 2025 alone, the country added 93 gigawatts of solar capacity, ...

In 2024, China achieved a record-breaking 278 GWAC of new solar PV installations, reflecting a 28 percent year-on-year increase, ...

China installed a record 60 gigawatts (GW) of new solar photovoltaic (PV) capacity in the first quarter of 2025 - the highest ever ...

As of May 2025, China has installed 1,080 GW of solar capacity, with May seeing China's largest monthly increase in operating capacity. China's annual solar additions jumped from 55 GW in ...

China has brought a 1 GW offshore solar power plant online off the coast of Dongying, Shandong province, combining PV with energy storage and aquaculture in what is ...

China has connected the world's first 1-GW offshore solar farm to the grid, a plant off Shandong set to generate 1.78 TWh per year.

China is leading the world in new solar and wind installations and doing so at a record-shattering pace. In May 2025 alone, the country ...

In 2024, China achieved a record-breaking 278 GWAC of new solar PV installations, reflecting a 28 percent year-on-year increase, driven by the grid connection of ...

In this guide, readers will explore the various aspects of solar installation, including technology, regulations, and financial incentives. We will delve into the benefits of solar ...

China is on track to set a new record for solar power installations in 2024, driven by falling production costs and increased global interest in renewable energy, said industry ...
