---

While Governor Kathy Hochul's administration champions a transition to renewable energy sources like wind and solar power, plans to construct large battery storage plants have ...

What is a Solar Energy BESS System? A Solar Energy BESS system combines solar panels, batteries, and other components to generate, store, and manage electricity. In ...

Gov. Kathy Hochul's plans for the Empire State to go green are going south as local communities refuse to build massive battery plants that would store wind and solar energy.

Hochul announced the creation of the Fire Safety Working Group and immediate inspections of storage sites in the state after a battery fire at a solar farm sent potentially toxic ...

The Riverhead Project, situated on a capped landfill in Riverhead, features a 7 megawatt (MW) solar array paired with a 13.6 megawatt-hour (MWh) BESS. It is expected to produce an ...

BESS, paired with solar energy, offers a practical solution by storing excess solar power for use during peak demand periods. The result? Farmers benefit from more reliable ...

The US state of New York expects to install 35GW of solar PV and 9.4GW of battery energy storage systems (BESS) by 2040. The New York State Energy Planning Board ...

On Long Island, communities from Hempstead to Southold are witnessing the introduction of a previously unfamiliar form of Green ...

By installing Battery Energy Storage Systems, farmers can store energy when it's cheaper--either during off-peak hours or when using solar panels--and use it when demand ...

East Africa: In Kenya, small-scale agrivoltaic projects use solar energy to power irrigation systems for water-intensive crops like maize and vegetables. With the addition of ...

On Long Island, communities from Hempstead to Southold are witnessing the introduction of a previously unfamiliar form of Green-adjacent technology in the form of Battery ...

The US state of New York expects to install 35GW of solar PV and 9.4GW of battery energy storage systems (BESS) by 2040. The New ...
