With a solar heat gain coefficient of 0.24 and 60% visible light transmission*, SNX 60+ glass delivers thermal performance without sacrificing natural ...

In a standard one-inch insulating glass unit (IGU), Solarban® 60 glass offers an exterior appearance similar to clear, uncoated glass.

Measured against windows assembled with ordinary clear glass, Solarban® 60 glass lessens solar heat gain by more than half. When the seasons turn cold, the high insulating value of ...

An energy modeling study conducted by an independent energy design and consulting firm showed that architects and building owners can potentially save millions of dollars during a ...

Solarban® 60 solar control, low-e glass by Vitro Architectural Glass (formerly PPG Glass) was engineered to control solar heat gain, which is essential to minimizing cooling costs.

With its ability to block 60% of solar energy while allowing 70% of visible light to pass through, Solarban® 60 glass can help you provide year-round comfort with heating and cooling cost ...

With its ability to block 62 percent of solar energy while allowing 70 percent of visible light to pass through, Solarban® 60 glass can help you provide year-round comfort with heating and ...

With a solar heat gain coefficient of 0.24 and 60% visible light transmission*, SNX 60+ glass delivers thermal performance without sacrificing natural light - for bright, comfortable interiors ...

Solarban® R100 glass is a neutral-reflective, low-e glass that provides significant improvements in solar performance compared to competing products in the same architectural ...
