Get your .solar domain name with GoDaddy! It is easy to register a .solar domain with the largest domain registrar.

Provides instructions for installing the Discovery Agent on Windows. Includes instructions for mass deployment.

Antireflection coatings (ARCs) are widely used in the photovoltaic (PV) industry to reduce the ~4% reflectance from the glass front surface.

If you plan to use a domain logon script for a Windows enterprise deployment, SolarWinds recommends deploying the Discovery Agent on all computers that log onto the domain.
