Bidirectional charging, or Vehicle-to-Grid (V2G), represents a more complex and transformative aspect of EV integration, requiring specific regulatory considerations beyond unidirectional ...

Currently, Spain is an avant-garde in energy futures. Since tariffs have been heightened by 22% in the year 2023 and EU green regulation is surging by 42% in the year ...

In dialogue with Mobility Portal España, Elis Álvarez González, CEO of Smart Wallboxes, analyzes the advantages and needs related to bidirectional charging in Spain.

This includes unidirectional charging, which optimizes the point of time and duration. In addition, bidirectional charging or vehicle-to-X (V2X) allows the discharge of ...

Spain is actively developing a comprehensive legal and regulatory framework to integrate smart charging (V1G) and bidirectional charging (V2G) technologies, aligning with its ...

Spain-based provider of electric vehicle charging and energy-management solutions, Wallbox NV, has unveiled its first Combined Charging System (CCS) bidirectional ...

In this article, we explore the rapid growth of the EV market, the current state of the charging landscape, and how Sigenergy is at the forefront of revolutionizing energy storage ...

Results of a comparative environmental impact assessment show the environmental impacts of unidirectional (V1G) and bidirectional charging infrastructure (V2G) ...

In dialogue with Mobility Portal España, Elis Álvarez González, CEO of Smart Wallboxes,

Spanish photovoltaic container bidirectional charging
