The program supports hybrid projects, which combine storage with renewable energy, such as solar or wind farms. Spain's electricity ...

Spain has awarded more than EUR818 million (\$956.3 million) in European Union funding to 126 energy storage projects totaling 2.2 GW of power and 9.4 GWh of capacity.

The scheme aims to deploy between 2.5 and 3.5 gigawatts (GW) of new storage capacity, enhancing the flexibility and resilience of the national power system while enabling ...

Hybrid storage projects are primarily paired with renewable generation, with solar power involved in 38 projects and wind power in 18 projects. Furthermore, nine projects ...

The Spanish Minister for the Ecological Transition and the Demographic Challenge (MITECO) has selected 126 projects with a combined capacity of 2.2 GW/9.4 GWh on its call ...

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities ...

Spain has allocated more than \$956 million (EUR818 million) in public funding to support large-scale energy storage projects, selecting 126 projects with a combined capacity ...

The program supports hybrid projects, which combine storage with renewable energy, such as solar or wind farms. Spain's electricity grid already generates more than half ...

Spain's ministry for the ecological transition said on Friday it will allocate EUR 700 million (USD 799.4m) in

grants through competitive tendering to support large-scale energy ...

The bulk of the EUR814 million (\$956 million) funding envelope will be directed to co-located energy storage projects, with standalone batteries receiving the next largest share.

These are followed by stand-alone battery systems (39 projects), thermal storage (15) and pumped hydro storage (three projects). Within hybrid solutions, solar PV is the most ...
