---

AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. The 1,000-megawatt (MW) Bellefield 1 project in Kern County, ...

The California Energy Commission (CEC) approved the Darden Clean Energy Project, the first to be fast tracked under its Opt-In Certification program. The CES said that ...

China has just brought the world's largest vanadium flow battery energy project online, marking a massive milestone in long-duration grid-scale energy storage.

BYD Energy Storage and Saudi Electricity Company have signed the world's largest grid-scale energy storage projects contracts totalling a capacity of 12.5 GWh at the time.

To solve the challenges that the size of large batteries poses to production lines and manufacturing processes, EVE Energy has specially built the 60GWh Super Energy ...

A large lithium-ion battery storage project that contributes to grid stability and supports the integration of renewable energy, Leighton Buzzard Battery Storage Park is a ...

Battery storage can help reduce energy costs, enhance the use of renewable energy sources and reduce reliance on fossil fuels. BYD ...

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

The world's first 400MWh energy storage project using 628Ah ultra-large cells has been successfully connected to the grid at Phase II of ...

The deployment of this world-first 600Ah+ energy storage power station is not only a technological milestone but also an industry signal: the era of large batteries for energy ...

The world's first 400MWh energy storage project using 628Ah ultra-large cells has been successfully connected to the grid at Phase II of the Ruite New Energy Project in ...

Battery storage can help reduce energy costs, enhance the use of renewable energy sources and reduce reliance on fossil fuels. BYD Energy Storage and Saudi Electricity ...
