-----

FlexGrid is a product for industrial, commercial and small utility applications. It offers capacities from 2 to 25 megawatts and is based on a new configuration of the B-VAULT ...

These installations embody what B-VAULT FlexGrid was designed to do: deliver compact, compliant, and intelligent energy storage where it's needed most, without ...

Primeo Energie will use our storage system to provide energy flexibility. The battery stores surplus electricity from renewable sources and feeds it ...

Flexbase Group has begun construction on what could become one of Europe's largest flow battery storage installations, ...

Primeo Energie will use our storage system to provide energy flexibility. The battery stores surplus electricity from renewable sources and feeds it back into the grid as needed. In this way, ...

As we approach Q2 2025's bid deadline, one thing's clear: Switzerland isn't just buying storage systems--they're procuring grid resilience. The winners won't be those with the cheapest kWh ...

The project entails the establishment of an energy storage facility with a remarkable output of 800 MW and a capacity of 1,600 MWh, setting new standards both in ...

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in ...

The CGES public-private platform enhances the stability, security, and resilience of the Swiss energy system by supporting the development of green storage through scalable demonstrator ...

So there you have it - Switzerland's energy storage landscape in 2025 isn't just about electrons in boxes. It's a wild ride of innovation where precision engineering meets ...

In an episode of "NextIn Business," supported by Deep Tech Nation Switzerland and the Gebert R&#252;f Stiftung, Swiss deep tech startups demonstrate how they are "reinventing" ...

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in Switzerland from 20MW to 28MW, making it ...
