Where can I study hydrogen technology in Zagreb?

the general public), the development of new innovative solutions and their commercialisation. Nowadays, several higher education institutions take part in courses related to hydrogen technology (Mechanical Engineering and Shipbuilding Faculty in Zagreb, Faculty of Electrotechnical, Mechanical E

Where underground gas storage facility is being developed in Croatia?

underground gas storage facility at the site of the "Grubisno Polje" exploitation field is under way. In addition, during regular activities of the gas storage system operator in Croatia, further development of the system is being pursued by continuous evaluation of new potential locations of underground geologic

How will household gas emissions in transport be regulated in Croatia?

household gas emissions in transport, which will be incorporated into the regulatory framework of Croatia. This is in line with Directive (EU) 2018/2001 of the European Parliament and of the Council of 11 December 2018 on promoting the use of energy from renewable sources (EEA Text) (OJ L 328, 21.12.2018), (hereinafter "ROW II") and

When will hydrogen be transported and stored?

The framework for the transport and storage (storage) of hydrogen is also expected to be adopted by 2025. The transport of hydrogen is also possible through the gas transmission system by blending the hydrogen, in a certain percentage, with natural gas in the transmission system with the subsequent separation of hydrogen from the mixture, if so

The hydrogen project is being implemented by Dok-Ing from Zagreb and municipal waste management utility Krizevacko Komunalno ...

The new H2 Competence Centre project will establish a comprehensive framework for setting up regional H2 competence centres, ...
