Anza reports on U.S.-made solar modules, cells and battery energy storage in today's pipeline and offers a glimpse at manufacturers' efforts to ramp up production.

The United States' energy storage market size for hydrogen systems is forecast to grow at a 28.5% CAGR through 2030, primarily targeting seasonal shifts and decarbonization ...

Anza reports on U.S.-made solar modules, cells and battery energy storage in today's pipeline and offers a glimpse at manufacturers' ...

In April 2025, Stryten Energy announced plans to build an energy storage manufacturing capacity of 10GW in the U.S. to add resilience to scaled domestic battery supply chains, and support ...

Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third quarter of 2025, with more than 30 GW installed. Solar and storage, ...

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

The U.S. energy storage market size crossed USD 106.7 billion in 2024 and is expected to grow at a CAGR of 29.1% from 2025 to 2034, driven by increased renewable energy integration and ...

Solar and storage dominate U.S. power growth in 2025, cutting costs, boosting jobs, and securing America's clean energy future.

While early adopters continue leading in deployment, activity across the country shows clear demand for utility-scale energy storage as a solution to rising electricity prices and ...

U.S. solar and energy storage are poised for significant growth in 2025. Explore the trends driving this transformation today!

Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends and business models, and updates on U.S. government ...
