Where does Venezuela export crude oil?

Most of the remaining crude oil was destined for India, China, and Europe. Venezuela has seven crude oil export loading points, in practice; however, most of its crude oil exports are routed through the Puerto Jose terminal, which is located offshore of the Jose industrial complex in northeastern Venezuela.

Why is Venezuela struggling with oil & natural gas development?

Furthermore, budgetary constraints at Venezuela's state oil company PDVSA and a lack of qualified technical personnel and foreign direct investment have all hampered Venezuela's oil and natural gas development. PDVSA is the largest source of revenue for the Venezuelan government.

Does PDVSA still produce crude oil in Venezuela?

Since PDVSA's main joint-venture partner Chevron (CVX.N) has not suspended exports of the crude grades they jointly produce, most inventories at Venezuela's western region, where storage capacity is very limited, are close to normal levels, the documents showed.

Why is the US pursuing a tanker seizure of Venezuelan oil?

The U.S. has continued pursuing tanker seizures after intercepting two fully loaded cargoes of Venezuelan crude earlier this month. Venezuela's oil exports in December fell to about half the 950,000 bpd they averaged in November, according to preliminary figures.
