-----  
How did Telia Lietuva achieve a 5G network?

2021-2023 During the period, Telia Lietuva successfully completed the modernization of its network using the most advanced Ericsson Radio Access Network(RAN) equipment. This gave Telia the opportunity to create an advanced 5G network at 3,5 GHz and 700 MHz frequencies, ensuring high-speed data availability throughout Lithuania.

Will Lithuania join 5G?

After the negotiations on 5G frequencies, Lithuania was the last European country to join the 5G wave, and the country's authorities gave the green light for the official start only in the fall of last year. Despite all the challenges, Telia together with Ericsson completed the project ahead of schedule and without any service interruptions.

Is 5G a success story in Lithuania?

The development of 5G in Lithuania can be called a success story. After the negotiations on 5G frequencies, Lithuania was the last European country to join the 5G wave, and the country's authorities gave the green light for the official start only in the fall of last year.

What is 5G Massive MIMO radio technology?

Ericsson's 5G Massive MIMO radio technology contributed to this achievement. The Antenna Integrated Radio (AIR) solution, specifically the AIR 3268, features a smaller and lighter design with higher bandwidth and capacity, enabling Telia to deliver lightning-fast and reliable 5G connectivity across the country.

"In 2018, we were one of the first ones in Europe to test 5G technology in live network in Vilnius.

The company has first activated the currently available 2100 MHz frequencies for 5G network in 20 base stations in Vilnius. Their signal covers the neighbourhoods of Antakalnis, Sauletekis ...

After receiving approval from the Communications Regulatory Authority (RCT) this week to acquire licenses to use radio frequencies, telecommunications companies have ...
