New highs for solar and wind power and battery storage are emerging on an almost weekly basis across the country.

But any meaningful slowdown in the growth of renewable energy and battery storage in the United States is likely to take a few years.

One of the most important enablers of the renewable boom is battery storage. These systems allow energy from variable sources like solar and wind to be stored and used ...

BEIJING (Reuters) -AI data centre-fuelled power demand growth in the U.S. is likely to drive a 'boom cycle' for energy storage in the next five years as more storage is ...

In 2025, we expect 7.7 GW of wind capacity to be added to the U.S. grid. Last year, only 5.1 GW was added, the smallest wind capacity addition since 2014. Texas, Wyoming, and ...

WoodMac predicts 5.4 TWac of new solar and wind will come online by 2033, as global energy storage capacity grows by more than ...

WoodMac predicts 5.4 TWac of new solar and wind will come online by 2033, as global energy storage capacity grows by more than 600%.

Energy storage additions in these two markets remain strong for now although recent policy changes slow new solar and wind in both markets. Energy storage installations ...

Clean energy momentum builds as solar and wind outpace global electricity demand growth Solar and wind are now expanding fast enough to meet all new electricity ...

Applications to build battery storage drive boom as offshore wind projects given go-ahead jump sevenfold year on year A record number of renewable energy projects were given ...

BATTERY BOOM AND STEALTHY PROGRESS Even as U.S. utilities burned more coal in 2025, they also rolled out record battery storage capacity to capture surplus solar and ...
