What are Zimbabwe's energy projects?

The Government of Zimbabwe has prioritised energy projects as one of the key enablers to economic growth and development. The prioritised projects include new plants and the optimization of existing plants and are expected to add additional power to the grid as follows:

What is public procurement in Zimbabwe?

Public procurement in Zimbabwe is centralised at the SPB (State Procurement Board). The SPB's mandate is to regulate and manage the procurement processes for all public entities in Zimbabwe, in accordance with public procurement legislation. The need to comply with SPB processes is the reason why many projects are behind schedule.

How much power does Zimbabwe import?

Currently power imports stand at around 400 MW. Industry and Commerce have struggled partly due to acute power shortages being experienced in the country. The Government of Zimbabwe has prioritised energy projects as one of the key enablers to economic growth and development.

Is Zimbabwe facing a power shortage?

Zimbabwe is currently facing power shortages with estimated reliable generation of about 1049 MW against an estimated suppressed peak demand of 2200 MW. Currently power imports stand at around 400 MW. Industry and Commerce have struggled partly due to acute power shortages being experienced in the country.
